BMC

## DESIGNER RESOURCE GUIDE

Bassett has been America's first name in home furnishings since 1902, when my great-grandfather opened his first furniture factory on the eastern slopes of the Blue Ridge Mountains of Virginia. Four generations later, **Bassett Mirror** is still a family owned business that keeps value in style and makes more than mirrors that are worth looking into! In addition to mirrors, we have fine art and decorative lamps. Our furniture portfolios include living room tables, accent furniture, dining sets and mirrored furniture collections.

**Bassett Mirror** is unlike any other home furnishings company in the world. It begins with a commitment to great design that originates in our sketchbooks and with our value engineers to offer beauty and affordability. It includes quick shipments (3-5 days) and quality controls that ensure your defect-free order arrives on time. Above all, we design beautiful vignettes in our showroom many of which are shown here in our annual Designer Resource Guide, creating assortments of BMC products that cannot be found elsewhere. Our Best Total Fashion Solution follows a simple recipe:

***Fresh Design + Affordable + Quality + Quick Ship + Presentation***

Spencer W. Morten, III

# Best Total Fashion Solution

## high quality materials

The folks at Bassett Mirror Company (BMC) believe that you should love your purchase — and not just because you like how it looks on paper. You should love your marble top table because it is real marble. You should appreciate your stainless-steel bar cart because it really is made of stainless steel. And you should value your crystal lamp because it is real crystal glass. A product is only as good as what goes into it — and you know nothing beats stainless steel to create furniture that will not rust or tarnish. At BMC, every design begins with a decision to use the best materials for the look and the feel that will last a long time.

## unmatched packaging

BMC invests in packaging to ensure you enjoy unpacking and setting up your home furnishings. This begins with our innovative EC-Pack that protects your table or mirror from transit damage. You can special order from BMC and know our products will arrive undamaged. Every product and carton has been engineered and tested in our in-house packaging lab to ensure BMC exceeds UPS and FedEx standards. We don't cut corners on assembly tools or instructions. New furniture and home décor should be a happy experience.

## great fit and finish

Your furniture is supposed to hold up — especially when it is used every day — and BMC is known for its high-quality fit and finish. This means we use tenon and dowel construction on hall chests and dining servers. It means we use seven screws to secure all chair backs to the seat. It means we hand touch all finishes: a vintage wood top demands lots of handwork to meet our company's standards. Our drawers come with full-extension metal guides to ensure they open and close without sticking. Dining chairs should encourage your family and friends to linger around the dining table.

## extra features

Almost every BMC product includes added features that many companies omit. Every BMC hall chest and dining server has special hand holds on the back for the times you need to move your furniture. The majority of our chairs feature stain-resistant fabrics. All of our lamps use four heavy gauge spokes to affix the shade to the harp. Our inset glass is tempered, and all of our drawered furniture has passed the 50-pound tip test.
